<input type="checkbox"/>	Plugin	Description

Go to the Woocommerce Settings page select the tab “Checkout” and then “Hipay Professional”, to proceed with the plugin configuration.

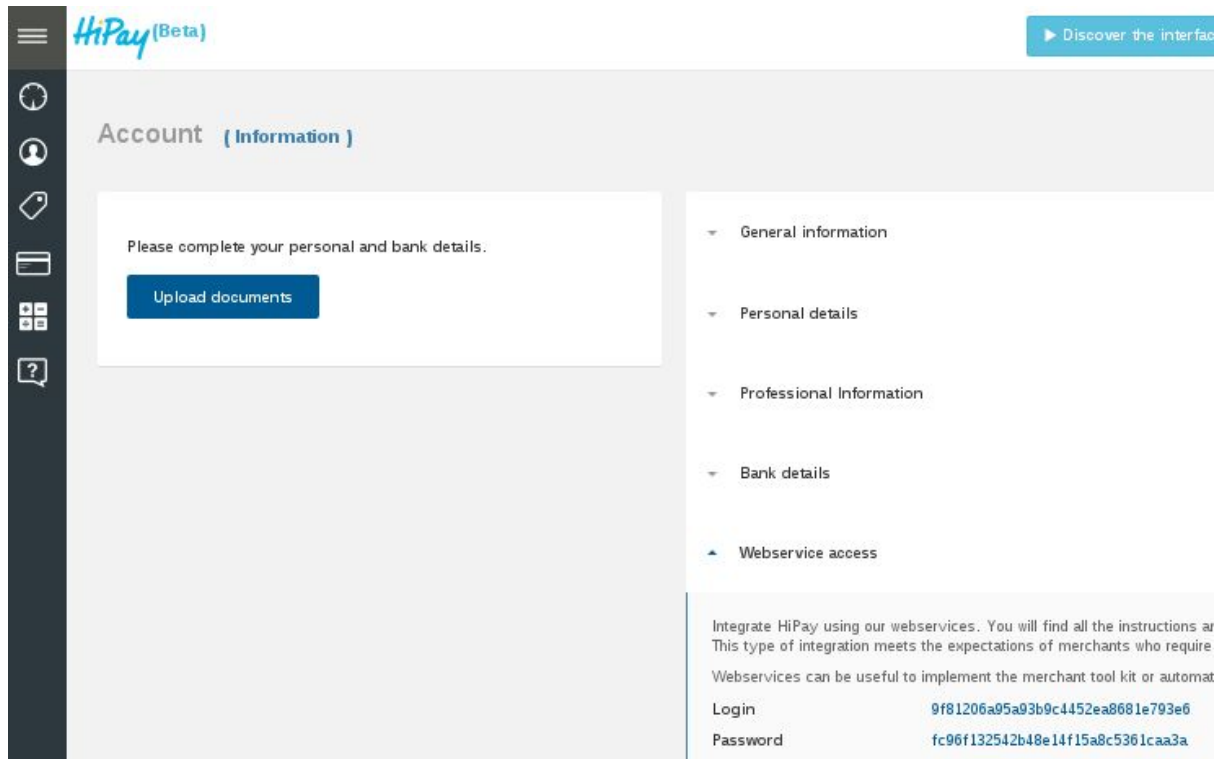

The screenshot shows the WooCommerce Settings page with the 'Checkout' tab selected. The left sidebar contains navigation links: Dashboard, Multi Currency, Posts, Media, Pages, Comments, Woo (selected), Orders, Coupons, Reports, Settings, Status, and Extensions. The main content area has tabs for General, Products, Shipping, Checkout (selected), Accounts, Emails, and API. Under the 'Checkout' tab, there are links for Checkout options: BACS, Cheque payments, Cash on delivery, PayPal, and HiPay Professional. The 'Checkout process' section is expanded, showing two sub-sections: 'Coupons' and 'Checkout process'. The 'Coupons' section has a checked checkbox for 'Enable the use of coupons' and a description: 'Coupons can be applied from the basket and checkout pages'. Below it is an unchecked checkbox for 'Calculate coupon discounts sequentially' with a description: 'When applying multiple coupons, apply the first coupon to the discounted price and so on.' The 'Checkout process' section has a checked checkbox for 'Enable guest checkout' with a description: 'Allows customers to checkout without creating an account'. Below it is an unchecked checkbox for 'Force secure checkout' with a description: 'Force SSL (HTTPS) on the checkout pages ([an SSL Certificate](#))'.

## 2. Configuration

### 2.1 Hipay Account

Before proceeding with the plugin configuration you must get the informations of your account from Hipay. The account can be either a real account or a test account (sandbox).

- The access to the webservice (Login and Password) can be obtained by selecting *Account »» Information »» Webservice Access*.

- Register a new website in *Products* »» *My websites* in case you don't have one configured, and get the Website ID from the list.
- The website category is automatically filled by the plugin after saving the account data on the plugin configuration.

In case the plugin does not get the category please check if the website id is correct or you can get the category by using the following URLs depending on the type of your account:

For a live account:

<https://payment.hipay.com/order/list-categories/id/WEBSITE>

For a sandbox account:

<https://test-payment.hipay.com/order/list-categories/id/WEBSITE>

On the URL, replace "WEBSITE" with the Website ID. Check the list of categories (1 or more) and choose one.

*Example:*

For the sandbox website with the ID "148779", the URL is

<https://test-payment.hipay.com/order/list-categories/id/148779>

and the categories list for the website

This XML file does not appear to have any style informa

---

```
<?xml version="1.0" encoding="UTF-8" ?>
<!-- Autres -->
<categoriesList>
  <category id="618">Autres</category>
</categoriesList>
</mapi>
```

The Category ID for the website is 618.
